

Course syllabus

DB201 is an introduction to relational databases: ER modelling, SQL, and normalisation. You will design schemas, write queries, and reason about data integrity.

What we cover

- Entity-relationship modelling and relational mapping
- SQL: SELECT, JOIN, GROUP BY, and subqueries
- Normalisation through 3NF with a running example

Assessment is one assignment, a midterm test, and a written exam.

Deadlines

Assessment deadlines for Introduction to Databases (DB201). Assignment 1: ER modelling is due 14 October 2026, 23:59. Midterm test: 2 November 2026. Final exam: 15 December 2026.

Assignment 1: ER modelling 14 October 2026, 23:59

Midterm test 2 November 2026, 09:00

Final exam 15 December 2026, 09:00
